Summer Reading + Summer Fun = Summer Learning for Everyone!

- Reading and talking about books starting at birth is one of the best ways to help little ones get ready to read. Babies and older pre-readers can participate in the Summer Reading Adventure by having books read to them. Ask about our year-round options for ages 0-6: ask about 1000 Books Before Kindergarten and our Early Learning Activity Challenge for ages 0-6.
- For school-age students, research shows that summer reading and library use help kids maintain and improve reading skills, and avoid "summer learning loss" through which they can fall further behind each year.
- Allowing kids to choose books that interest them – reading for fun – is key to frequent and successful reading practice. The library enables this by providing free access to a wide variety of books.
- Library visits give parents and grandparents opportunities to "model" interest in reading, to talk about books and participate in activities together. We have summer reading programs for adults as well as children and teens!
- Free classes, events and storytimes at the library enrich the life experiences of kids from all socioeconomic levels and help build background knowledge and vocabulary – two more factors in reading success.
